A **unique support platform** for **Public Transport stakeholders** to comply with the **MMTIS Delegated Regulation** using the full potential of **EU CEN Data Standards**.

Offering:
- ✓ **Knowledge sharing**
- ✓ **Capacity building**
- ✓ **Open-source validation tool**

To empower and align:
- ✓ **Public Transport Authorities, Operators, Ministries**
- ✓ **Multi-modal and cross-border travel information services**

Project Pitch
Urban Mobility Days 2023, Seville

Budget: 2,423,200 €
Funding: 1,998,560 €
Timespan: 2020-2023 (4 years)

BEFORE DATA4PT tool

✓ **Many EU MS had no published multi-modal data at all**

→Nowhere to start

✓ **Most of the published data** across EU claiming the NeTEx format **had errors**

→ Not useful
or interoperable data

Italy, one of the MS building from scratch
National **A**ccess **P**oint
for multimodal mobility data

High quality conforming accessible data

Suitable for…
planned data (timetables etc.)

high-level managers and developers (Web interface & desktop version
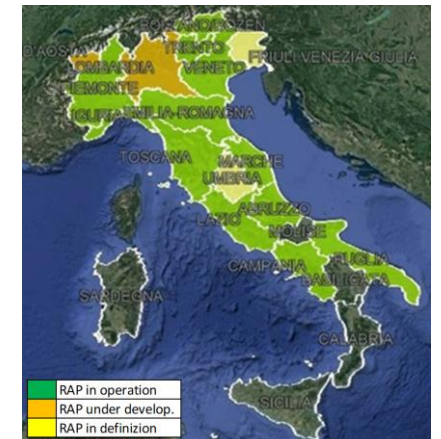

all MS and their national needs

AFTER DATA4PT tool

Croatia, Czechia, Slovenia and Portugal built their NAP using DATA4PT resources

Austria, Denmark, France NAPs improved published data and introduced the tool in their processes

IT suppliers of transport authorities and operators improved their services

✓ **More than 50%** of Italian Regions and international operators **publish validated standardized datasets in** Italian NAP

✓ **Milan, Rome, Naples use the validated NAP data for MaaS applications** as the first pilot of "MaaS for Italy" project
